Introductory Training Course in EWI Application

Limited spaces available so to avoid disappointment
BOOK NOW!

Dwindling fossil fuel reserves, targets for the reduction in carbon emissions and global warming have put energy at the heart of the Government's green strategy. Billions of pounds are being channelled into the adoption of energy saving measures across UK homes in an effort to meet the UK target of an 80% reduction in carbon emissions by 2050 compared with 1990 levels.

The Government has launched the Green Deal and ECO initiatives to meet this target and it is therefore anticipated that there are great growth opportunities for applicators in the application of External Wall Insulation Systems.

Currently there aren't enough trained applicators to meet the likely demand, so **Fusion 21**, in partnership with **Villages Housing Association** and **alsecco UK** are running a series of **FREE** introductory training courses in the application of EWI systems.

ARCHITECTURAL FAÇADES

Whether you are a tradesman looking to diversify, someone new to the industry looking to work within this growing market, or simply looking to learn new skills, this one-day introductory course is ideal.

The one day practical training course will cover the following areas...

- Preparation of substrate
- Baserail application
- Adhesive application
- Insulation installation – Either EPS or Mineral Wool
- Reinforced basecoat application
- System sealing options (around windows etc)
- Top primer application
- Textured top coat application
- Good / bad practice presentation

Places are limited as only 8 people can be trained per day **book early to avoid disappointment**

email nancy.sutton@fusion21.co.uk

One-day courses commence from Thursday 4th October

All courses will take place at: Fusion 21 offices – Building Skills Centre, Huyton, Merseyside, L36 6AP.

The Partners...

REECH (Renewables and Energy Efficiency in Community Housing) is a European Regional Development Funded project aimed at improving energy efficiency in some of the most deprived communities in the Liverpool City Region. Working with Registered Social Landlords throughout the City Region, and managed by Sefton Council, REECH will provide a range of low carbon technologies in over 2000 homes at a cost of £15million. It is envisaged that the increased demand for green technologies will provide new business opportunities for local suppliers and contractors working in the green energy sector. The programme is funded by the European Regional Development Fund, Sefton MBC, Liverpool LCC, St Helens MBC, Knowsley MBC, Halton BC, Plus Dane, Helena Partnership, Villages Housing and other social housing providers. For further information please contact the REECH Team on 0151 934 4619.

The European Regional Development Fund (ERDF), managed by the Department for Communities and Local Government, is making a real difference to people and businesses in the Northwest. With €755 million to invest between 2007 and 2013, ERDF is enhancing the competitiveness of the region's economy by supporting growth in enterprise and employment. For more information visit www.communities.gov.uk/erdf

Fusion 21 offer intelligent procurement services that deliver social value, make the procurement process more efficient and generate significant cash savings. Fusion 21 work closely with their members to deliver cost efficient savings, sustainable products, value within the supply chain and project management services.

Villages Housing Association own and manage more than 3000 properties in Knowsley, Oldham and St Helens. Their ethos is locally based and their activities support both community priorities and local authority objectives through their local area agreements.

alsecco UK are a leading manufacturer and supplier of external wall insulation systems. With over 50 years' experience in the industry, all systems are independently tested and have a certified life expectancy of up to 60 years.
