

## Increase your Digital Skills!

Employers are increasingly looking for people with digital skills. If you are aged 16-25 and unemployed increase your skills while having a fun week working with a group to come up with an app idea, before designing and developing a prototype to present to invited guests.

Not only will it help you discover new talents and develop new skills, but you'll also benefit from support from one of our mentors to help you uncover your next steps.

- Learn how apps are made
- Understand what makes a good app
- Design and produce an app
- Learn about coding
- Get support and feedback from software design engineers at HCL, a multinational IT services company, and find out more about their jobs
- The course is **free**, travel expenses paid on programme and lunch provided

Training delivered by

**MADE BY MILK**

**It doesn't matter whether you know nothing about tech or have a software degree- all abilities catered for and there's always something to learn.**

The course will run from 11th – 15th December 2017 in Liverpool. Join us at a taster session on 6<sup>th</sup> December to find out more.

**To join the course or find out more information contact Daniel Goodwin on 0743 683 6227, Email [Daniel.goodwin@princes-trust.org.uk](mailto:Daniel.goodwin@princes-trust.org.uk) or Text 'Apps' to 0743 683 6227**
